新自由主義・戦争と対決し労働者の国際連帯で闘おう！

Let's create international workers' solidarity and fight against neoliberalism and war!

NO to Massive Military Build-up and Promotion of Nuclear Power Plants!

Never Let Kishida Administration Take Part in War!

Stop War--World War-- by Workers' International Solidarity!

The unleashed Kishida administration is pushing forward with its nuclear power plant and "defense" politics.

Having gained the endorsement of International Atomic Energy Agency (IAEA), the Kishida administration has trampled down the anger of the whole world and is going to launch a long-term dumping of radioactive contaminated water into the ocean. Moreover, it plans to put manage a huge amount of money in restarting dilapidated nuclear power plants, building new ones, and developing new types of reactors.

Kishida also enacted a legal framework that creates a system to nationalize defense industries and allows for unlimited tax hikes, and embarked on a massive military buildup that would double defense spending over the next five years.

Never let Japan to participate in Ukraine War!

Kishida attended the NATO Summit in Lithuania, where he schemed specific efforts to participate in the Ukraine War and even implied the possibility of the opening of a NATO liaison office in Tokyo as part of preparation for the "Taiwan

contingency."

In addition, in response to Biden's real intention to get Japan's full cooperation as indispensable condition to carry out a war against China, the Kishida administration has stifled the protests of local residents and launched building missile bases in order to turn Okinawa, the Southwest Islands and all of Japan into bases for attacks.

Take back the class struggle labor movement to all workplaces and overthrow the Kishida administration which is seeking an outlet for the crisis of neoliberalism in war, making Japan an aggressor.

Solidify Workers' International Unity and Stop World War!

On March 20th, 2003, the U.S. imperialists launched a war of aggression on Iraq. At this major turning point in history, Doro-Chiba went on a full-scale 72-hour strike on March 27th and joined 20 million anti-war demonstrators around the world.

Now, 20 years later, the US, European and Japanese imperialism plot to combine the quagmire of the war in Ukraine with the genocide against Palestine and Gaza people, and are heading into world war.

There is a strong and pressing need for a dramatic deepening and expansion of workers' international solidarity.

We ask you to attend the Workers' International Solidarity Rally on Saturday, November 18th and the National Workers' Rally on the following day, Sunday, November 19th.

No to imperialist and Stalinist robbers' assault on the world!

Let us form a strong solidarity and stand up to stop the world war!
