The Workers United, will Never be Defeated

Here Lies the Power to Stop War and Change the World

The History of Japanese Imperialist Aggression

Since becoming a capitalist country at the end of the 19th century, Japan repeatedly waged war and carried out brutal invasions of Taiwan, Korea and mainland China. As a result, Japan became the sole imperialist power in Asia. Japan colonized Taiwan and Korea and expanded its wars of aggression from all of China to the entire Asian region. By the time Japan was defeated in 1945, the Japanese military—Emperor's Army—had massacred 20 million Asian people. Unscared, however, by the repeated massacre, the people of Asia rose up strenuously. As a result of their fierce armed struggle against Japan, it was completely defeated in August 1945.

Japan Continues to Take a Brazen Stance on War Crimes 80 Years After the War

Yet even today, Japan has continued to deny its state war crimes, including forced abductions, forced labor, and the Japanese military's comfort women system. These crimes constitute genocide aimed at the annihilation of other ethnic groups. Japan has not only refused to apologize or provide reparations, but has also made no effort to investigate the truth. Now, Japan is falsifying history by claiming that the Nanjing Massacre never happened. The country is charging ahead toward a new war of aggression—a war of aggression against China. The intensification of discrimination and xenophobia is a form of aggression in itself. Let us stand in solidarity with Chinese, Korean, and foreign residents in Japan and fight together.

August 6, Hiroshima: 80 Years Since the Atomic Bombing

We Raised our Voices Loudly against War and Nuclear Weapons, Overcoming Unjust Restriction on our Rally

We confronted head-on the violent exclusion by riot police, holding our anti-war, anti-nuclear rally in front of the Atomic Bomb Dome. We stood firm against arrests and suppression, maintaining our stance against war and nuclear weapons. We denounced Prime Minister Ishiba's attendance at the ceremony and called for prevention of nuclear war. (August 6, 2025, Hiroshima City)

The Looming Crisis of World War III

The world is now heading toward World War III. US imperialism, exemplified by Trump's tariffs and bombing on Iran, is the root cause of this world war. Once the center of the postwar world, US imperialism is now erupting a crisis of its domination. Crying "America First," it is targeting and pressuring China to make Taiwan part of its sphere of influence. Though born of the Chinese Revolution, today's China is nothing but Stalinist state. As an anti-people military counterforce, China is on a brink to become another party of this world war. Like imperialism, Stalinism—having abandoned world revolution—is also a target for overthrow by the working class.

Fight to Stop the War of Aggression against China

We owe blood debts to the Chinese people, whose country Japan once invaded and devastated. The time has come to stand up and prevent Japanese and US imperialists from waging war against China. We must launch a massive anti-war movement in Japan and overthrow our own imperialism through a civil war. Let us stand in solidarity with the fighting people of China and Asia and prevent a war of aggression against China.

Stop the Massacre of the Palestinian People

Two years since the October 7 Palestinian Uprising, Israeli massacres in Palestine have claimed over 60,000 lives, including those of children who have starved to death. Furthermore, Israel has ordered Gaza City residents to "evacuate by October 7", aiming to annihilate the existence of the Palestinian people. We must stop at all costs this genocide unfolding before our eyes. Let us resolutely support the Palestinian people's national liberation and revolutionary war, and overthrow Japanese imperialism and the Ishiba regime, which is complicit in the massacre!
